

LADON SOFTWARE - Version 7

CLEARLY DIFFERENT

CLEARLY DIFFERENT

Ladon 7 is an easy to use CCTV software system with client server architecture that allows multi-user remote management of multiple video surveillance devices.

Features

- Multilevel graphic maps management
- Client server based
- Remote management of multiple devices
- Instant replay function
- Scheduled recording
- Advanced alarm events management
- Advanced diagnostics
- Video matrix function
- Automatic sequences
- Flexible screen layouts
- Video export function
- Remote control of sensors and output contacts
- IP door phone function
- Advanced user management
- Advanced playback search
- Speed dome control
- Reports print/export

Versions & Licenses

Ld7-Entry

Client-only version, allows you to connect to 1 x Ladon DVR or 4 x Ladon IP cameras, does not allow integration of third parties IP cameras. No event management; only allows you to display live video, playback, recording and AVI export. Cannot manage Omnicom Outputs.

Ld7-Basic

Client-only version, allows you to connect to 4 x Ladon DVRs or 9 x Ladon IP cameras, does not allow integration of third parties IP cameras. Allows pop-up view on event. Allows management of Omnicom Outputs.

Ld7-Basic-OmOut

License for a DVR or an IP Camera relay control module (Omnicom Outputs).

Ld7-Pro-Server-00

Ladon 7 Server software for video streaming and video recording (NVR) management. Manages the delivery of video streams to client stations and the recording of images from compatible devices. Includes the license for 2 IP cameras or 2 video encoders or 2 DVRs and 2 client for simultaneous display. Possibility of expanding up to 100 video sources (IP Camera, Video Server, DVR inputs) and 10 clients (max 200 video streams in contemporary output).

Ld7-Pro-Cam-1-00

License to connect 1 video from a video server or an IP camera to a server. The license allows you to display images, their records and alarms management.

Ld7-Pro-KB-1-00

License for 1 keyboard connection to a client for speed dome management. Must be ordered in addition to a client license.

Ld7-Pro-Client-00

Client license for Ladon 7 software, to connect an additional client to the server. The client installation can take place with no limits, but only the number of clients expected by licenses can simultaneously connect to the server. The client license is also to connect via SDK. The client can be a PC, a matrix monitor or a mobile terminal and you can connect it to multiple servers simultaneously.

Ld7-Pro-DVR4-1-00

License to connect a 4 channel DVR to a Ladon 7 server. The license is valid for all video inputs of the DVR and allows the display of images, their registration and inputs / outputs management, both integrated and external.

Ld7-Pro-DVR8-1-00

License to connect a 8 channels DVR to a Ladon 7 server. The license is valid for all video inputs of the DVR and allows the display of images, their registration and inputs / outputs management, both integrated and external.

Ld7-Pro-DVR16-1-00

License to connect a 16 channels DVR to a Ladon 7 server. The license is valid for all video inputs of the DVR and allows the display of images, their registration and inputs / outputs management, both integrated and external.

Ld7-Pro-OmOut

License to configure a DVR or an IP camera via a relay control module (Omnicom Outputs).

Ld7-Pro-Matr-1-00

License for video matrix function. Allows you to define some clients as a matrix monitor controllable by client workstations. In addition to the array module is necessary to order the client license.

Ld7-Pro-Door-1-00

License for IP door phone connection. Allows you to configure a video encoder in door phone mode and forward intercom calls to the enabled clients, from which the operator can start a two-way audio communication and manage the call. To add the license for the connection of 1 video from video encoder.

Ld7-Pro-Conf-1-00

Confederation license. Allows you to create groups of servers to share video sources, alarm inputs and control outputs. The confederation license must be ordered in addition to the license server based and provides access to resources provided by other servers.

Ld7-Pro-Stream-1-00

Streaming license. Allows you to distribute one or more video streams from other servers to different users, thereby reducing the traffic between the source and the users group. Without the streaming license, users that require different video streams from other servers generate separate streams, with a heavier network. The streaming license must be ordered in addition to the basic server license and to the configuration license.

Ladon Mobile is a revolutionary service that allows you to connect and control a DVR and cameras from your mobile phone, iPhone, PDA or a PC reliably from anywhere in the world.

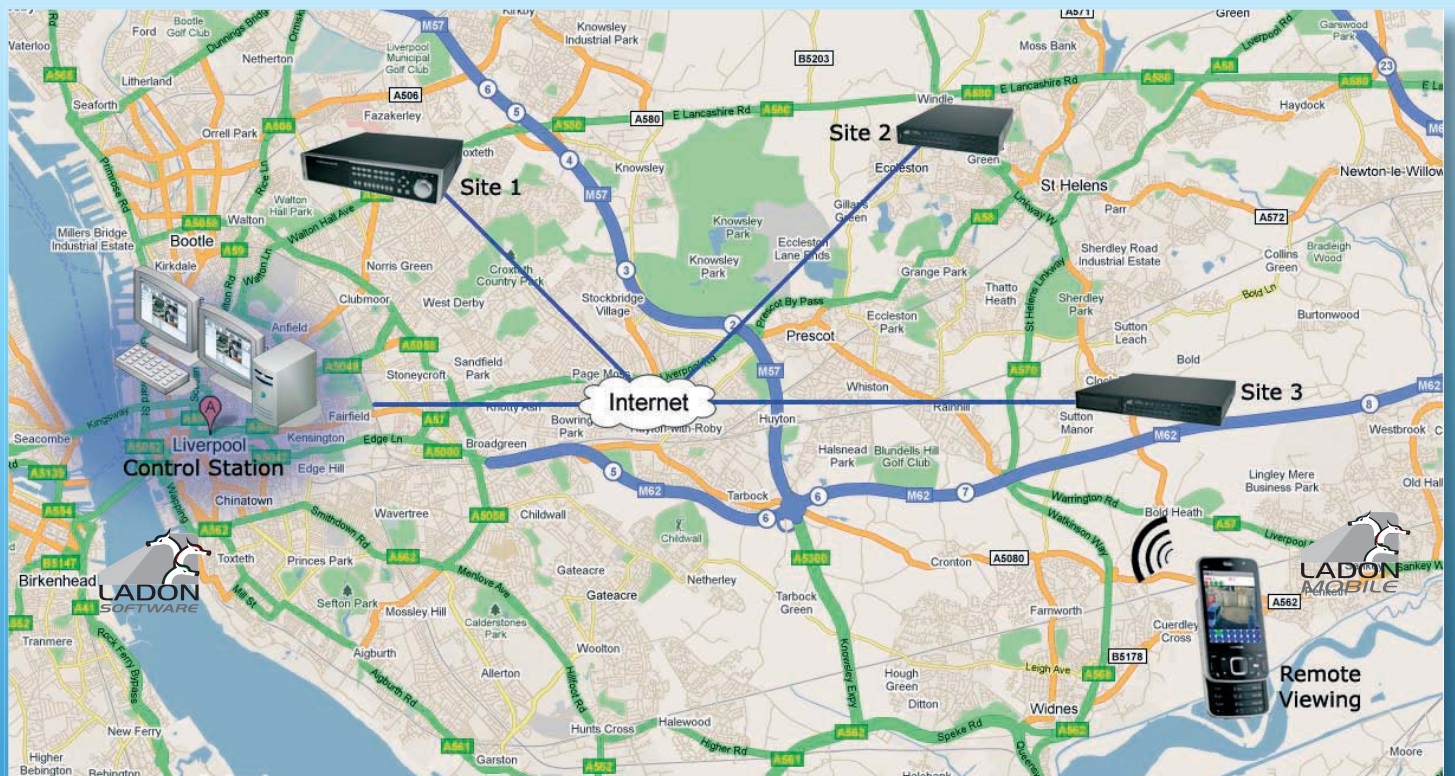

The Management Software for the complete Ladon DVR series is available via our own Video Server for phones, smart phones and PDAs with support using J2ME (Java).

Features

- Live view
- Playback view
- Event list
- Speed dome control
- Control of interface modules
